**Network Design and Management**
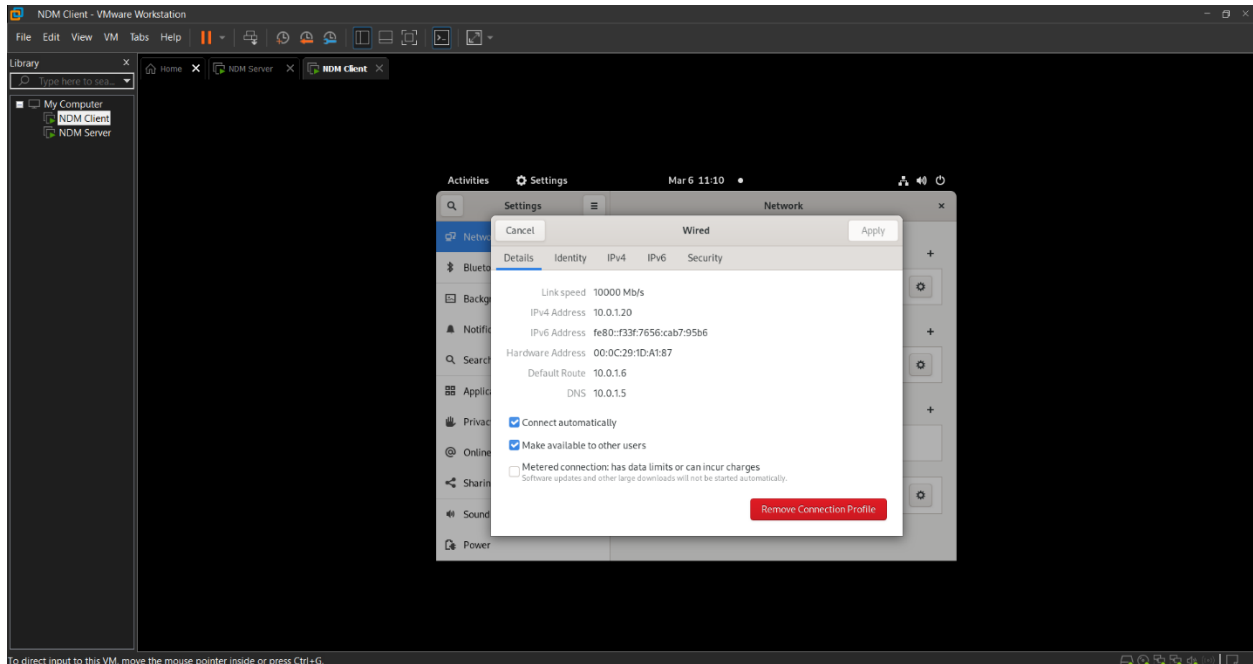

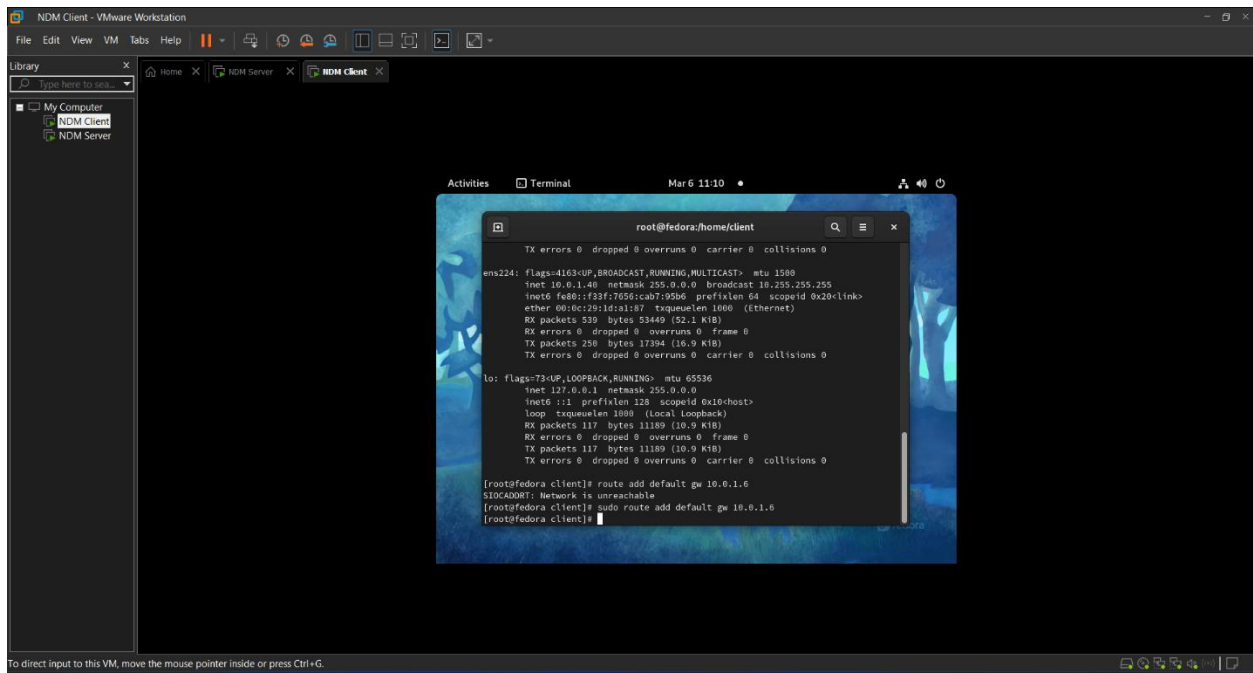

Practical 2 Report

3rd Year 2nd Semester

IT22898920 – Pasanjith W.A.R
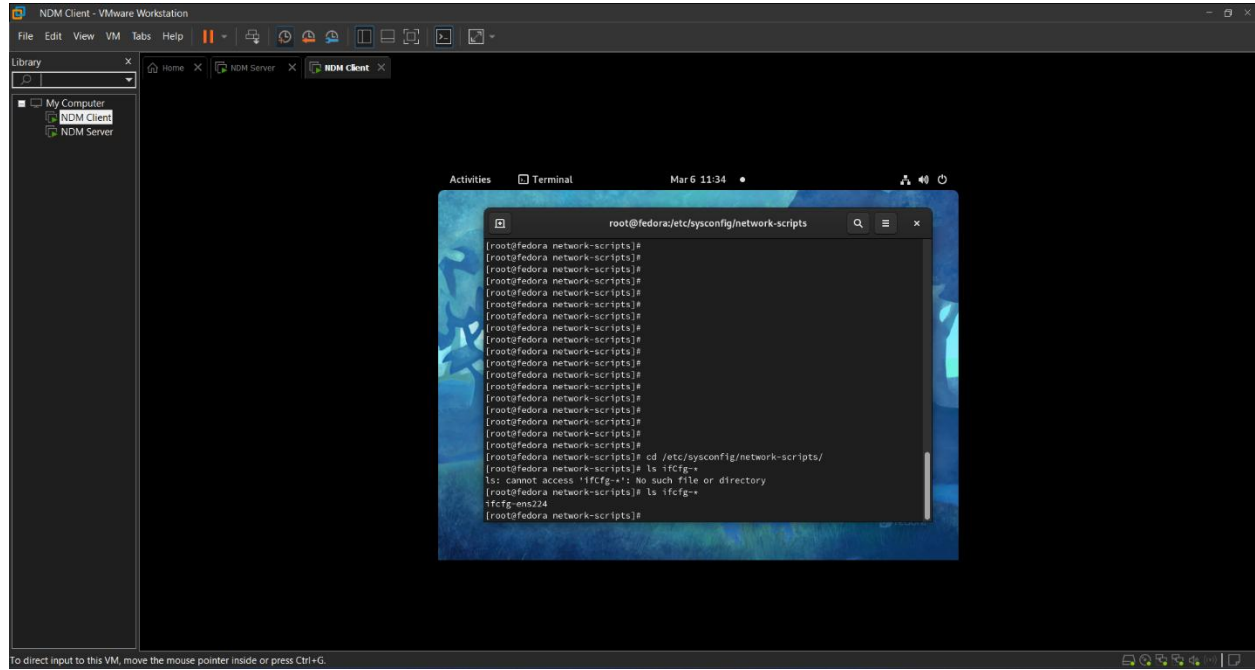

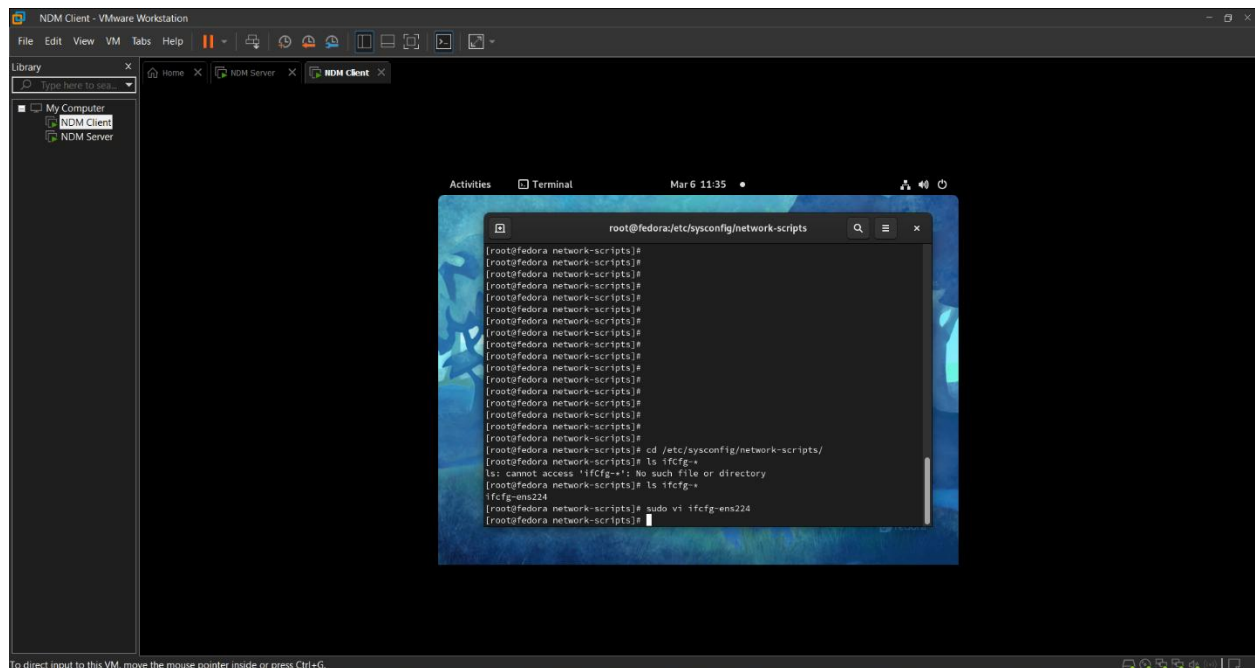

Assign tempary ip address

Assign default gateway

Editing Network Interface Configuration File

Interface configurations files are in the /etc/sysconfig/network-scripts

Interface configuration files will start with the phrase "ifcfg-"

Open up the relevant interface configuration file and edit the IP address related information according to the requirements

After editing the configuration file, save it.
