

Google Workspace Email Migration

Step by Step Guide

What You Need Before Starting

- Google Workspace Admin account (admin@yourcompany.com)
- Old email login details (email + password)
- Internet connection

Step 1: Login to Google Admin Console

1. Open your browser
2. Go to **admin.google.com**
3. Enter your Admin email address
4. Enter your Password
5. Click **Sign In**

Step 2: Go to Data Migration Tool

1. Look at the left side menu
2. Click **Account**
3. Click **Data migration**

Step 3: Start Migration Setup

1. Click **Set up data migration** button
2. Select your Migration source:
 - Gmail: Select Gmail

- Microsoft 365: Select Microsoft 365
 - Other email (cPanel, Hostinger, GoDaddy): Select **Other IMAP server**
3. Keep Connection protocol as Auto select
 4. Click **Connect**

Step 4: Enter Old Email Server Details

Field	What to Enter
IMAP Server	mail.yourolddomain.com
Port	993
SSL	Yes

Step 5: Connect Your Old Email Account

1. Click **Start**
2. Enter your old email address
3. Enter your old email password
4. Click **Authorize**

Step 6: Add Users to Migrate

1. Click **Add user** button
2. Enter **Source email** (old email): john@olddomain.com
3. Enter **Destination email** (new email): john@newdomain.com
4. Click **Start**
5. Repeat for each user

Step 7: Wait for Migration to Complete

- **In progress** = Still working

- **Completed** = Done!

Step 8: Verify Migration Success

1. Go to **gmail.com**
2. Login with new Google Workspace email
3. Click **All Mail** on left side
4. Check if your old emails are there
